

SAWTELLE DIRECTS U. S. ATTORNEY TO DISOBEY DAUGHERTY'S ORDERS

PHOENIX, April 27.—Thomas A. Flynn, United States district attorney, this afternoon assured Judge Sawtelle in the federal court that he would assist the federal grand jury in any investigation it might make regardless of any instructions he might receive from the United States attorney general. Mr. Flynn's statement followed a short address to the grand jury by Judge Sawtelle, in which he directed the district attorney to assist the jury in the discharge of its duties.

"Yesterday you asked me," said Judge Sawtelle, addressing the grand jury, "in the event that you decided to proceed with the investigation under consideration, what assistance you might expect of the United States attorney."

"I replied that I did not care, at that time, to express an opinion or answer your question, that I supposed the United States attorney would communicate with the attorney general and ask for further instructions, and that I would defer my answer for the time being."

Orders Attorney to Act

"I have been informed that the United States attorney has communicated with the attorney general and has been instructed by the latter not to present the case, or to attend session of the grand jury until directed to do so, and that until decision in the Newberry matter there would be no further investigation or proceedings. That being the situation, I conceive it to be my duty to answer your question of yesterday and today that, in the event you deem it to be your duty, under all the circumstances, to proceed with your investigations, you have the right to demand of the United States attorney that he attend your sessions and assist you in the discharge of your duties, and the United States attorney being an officer of this court, is by this court requested and directed to render you such assistance as you may request."

"I think that answers your questions."

After the grand jury had left the room, the judge said to Mr. Flynn:

"That, Mr. United States Attorney is my view of the situation."

Flynn to Defy Superior

"Yes, your honor," replied Mr. Flynn, "I have listened attentively and heard every word you said, and will give the matter due consideration. I shall advise the attorney general of the attitude of the court and of his directions to me; and I will further advise him, with all due deference and respect to his authority as my superior officer in the department, that I conceive it my duty as an officer of the court, to obey the orders of the court."

"You may so notify the grand jury," remarked Judge Sawtelle, closing the incident.

DEAF, DUMB SCHOOL CONSTRUCTION WILL BE BEGUN SHORTLY

After many months of delay and difficulty the plans for the new home and school for the deaf and dumb are at least nearing completion. Within a few weeks the last detail will have been decided and ground will have been broken for the new buildings.

The community system will be followed as far as possible and the appropriation is large enough to enable those in charge to lay out a very extensive and gratifying program.

Group dwellings are to be provided to create a homelike atmosphere and there is to be a dining hall and administration building.

Ample land is provided for farming, which is to be carried on under the latest approved methods.

Such deliberation has been used in working out the details as to insure against mistakes and every thing points to a speedy and proper completion of the new institution with a view establishing something worthy and worth while.

The delay which has occurred in the construction of the building has been due to a complication in the land title. After the appropriation was passed by the fourth state legislature, it was found that the negotiations for the land failed to show proper title in the state and it was therefore necessary to pass correct-

ing measures at the session of the fifth state legislature just closed.

With that done, and the money available in the state treasury, the administration has been going ahead as rapidly as possible with preliminary incident to the first breaking of ground. It is believed that within a period of about thirty days, such substantial progress will have been made as will insure the prompt starting of actual construction work.

BOYS KILL BIRDS IS COMPLAINT MADE

PHOENIX, April 28.—Violation of the state game laws by Phoenix school boys has been called to the attention of Joe V. Prochaska, state game warden, with whom numerous complaints have been filed relative to the killing of birds by sling shots and air rifles.

That the juvenile court will be the last resort was the promise made by the game warden yesterday who said he would first appeal to the parents, reaching them through the schools.

Realizing that there is an epidemic of spring fever, Mr. Prochaska said that many of the cases might be based on mischief, but that the boys must be made to understand the seriousness of their actions.

"I am going to take the matter up with the schools," said Mr. Prochaska, "and through the teachers hope to reach the parents. The Boy Scouts are co-operating with me, but they are not sufficiently organized in Phoenix to reach the large number of school boys who must be taught that they cannot shoot birds. I do not want to take the matter into the juvenile court and will not do so unless I find it is the only way to enforce the law."

The law which he says is being violated reads as follows:

"It shall be unlawful for any person in the state of Arizona at any time, to hunt, pursue, kill or destroy any lark, thrush, sparrow, swallow, grosbeak or tanager, or any other song bird of any kind, provided that nothing in this title can be so construed to interfere with the collection of birds for scientific purposes by the curator of the state museum, or by any other person authorized by the state game warden of this state to collect."

BILL TO PROTECT ARIZONA MONUMENTS

PHOENIX, April 28.—Claiming that the leasing of a certain section of the state land in Yavapai county works a hardship to sheepmen in trailing their herds between their winter and summer camps, a delegation of prominent men headed by Hugh E. Campbell, president of the Arizona Wool Growers' association, yesterday appealed to Rudolph Kuchler, state land commissioner, in the matter.

The land in question contains water, the sheep men said, and if they are not permitted to pass through the section it will interfere with the transitory herds.

Mr. Kuchler detailed T. L. MacLeod and F. H. Perkins, engineers of the land department, to investigate and make a report in order that he might take an early action in the case.

Among the sheep men who protested at the leasing of the land were Hugh E. Campbell, William Campbell, Charles Burton, Lou Charlebois, Joe Stephens and J. L. Dagg. The members of the delegation are all large sheep owners who have winter camps in the southern part of the state, and in summer return the herds to the north.

Nogales—State engineers to rush road work throughout county.

FOREST FIRE IN CATALINAS REPORTED

TUCSON, April 28.—A forest fire is raging in the Catalinas, according to a report received by the Forest Service office here. While there is no danger attending the conflagration, rangers were rushed from Tucson yesterday afternoon to the scene of the fire to prevent further loss of timber.

Other than location, set forth as in the proximity of Rice Peak, at Canada del Oro, on the north side of the watershed, reports carried out meagre details of the fire.

Forest Service officials, in view of the fact that no lightning storm had been reported within the last few days from the district in which the fire is now burning, are of the opinion that the conflagration was started by some human agency. A camp fire left burning, or a burning match or cigarette carelessly tossed away by some camper, in their belief, was responsible for this loss of valuable timber.

The Catalinas, in the vicinity of the forest fire, is at the present time heavily wooded by pine, oaks, manzanita and other shrubs.

BROTHER AND SISTER MEET AFTER 57 YEARS

KINGMAN, Ariz., April 27.—For the first time in 57 years brother and sister came together in Kingman yesterday, when A. S. Chapman, a newspaper publisher of Madison, Indiana, and Mrs. John Kay, of Mineral Park, met. With their parents Mrs. Kay and Mr. Chapman went to California when they were children and were separated in 1863, the brother becoming a sailor before the mast and sailing the seven seas for twenty years, finally becoming master of one of the large packet steamers sailing between America and the Orient. After his marriage he quit the sea and settled down near the old homestead in Indiana. Miss Chapman, as she was then, remained with her father in San Francisco, until her marriage with the late Capt. Welbourn in 1874, when she removed to Mineral Park, where she has resided ever since. The meeting between these long separated brother and sister was affecting. Mr. Chapman had with him on his trip his daughter. The two were greatly taken with the scenic beauties of the country and may come again.

DYNAMITE EXPLOSION CAUSE OF ACCIDENT

AT DOS CABEZAS MINE DOUGLAS, April 28.—Mysterious explosion of dynamite in the hands of a miner was the cause of the accident at the Central Arizona Mining company's shaft at Dos Cabezas, according to State Mine Inspector John F. White, who was in Douglas yesterday with Deputy Inspector E. F. Myers. White said that Myers, who investigated the accident, reported that a man named Burke was killed and his partner, Gibbons, so badly injured that he is not expected to live.

According to information Myers obtained, Gibbons and Burke were cleaning up after a blast, and the former handed Burke four or five sticks of dynamite. Burke turned away, Gibbons said, and in a few seconds a loud explosion occurred, which tore Burke to pieces and hurled Gibbons several feet in the air and against the shaft. Gibbons is now in a hospital at El Paso, suffering with several broken ribs, a dislocated hip, had cuts and probable internal injuries.

CONVICTION OF MOON APPEALED

PHOENIX, April 27.—George Hill, assistant attorney general of Arizona, today filed a brief in the state supreme court defending the finger print evidence offered in the superior court of Cochise county against Charles (Chet) Moon. Moon was convicted of burglary and was sentenced to from five to 15 years in the state penitentiary. He appealed his case to the supreme court.

Moon was convicted of taking about \$2,000 from a butcher shop in Bisbee. Much of the evidence consisted of identification of the defendant by means of finger prints on the cash register.

"The basis of identification by finger print," said Hill's brief, "lies in the fact scientifically established that no two finger patterns are alike, and that duplication of 14 points of identity would not happen once in some thirty billion comparisons of finger prints. Hence, it follows as a mathematical certainty that there was no practical possibility that the finger print on the cash register was made by any finger other than the finger of this defendant; all of which is carefully developed, explained and demonstrated in the testimony in this case."

PRINTER SHOTS HOLD UP MAN

NOGALES, Ariz., April 27.—Early yesterday morning Tom Paredes, a printer employed by The Herald, shot and wounded a robber who attempted to hold him up as he was on his way home from work. The shooting occurred opposite the Santa Cruz hotel in Terrace avenue, Paredes opening fire with a revolver on the robber who accosted him roughly, saying "hands up."

Paredes fired but one shot, his revolver jamming. The robber sprinted south through Mix street disappearing in the darkness.

Patrolman Ed Webb found the robber's hat with a bullet hole in it and trailed the robber through a stream of blood as far as Sonoma avenue and Mix street where the trail was lost.

SMELTER AT MIAMI ENTIRELY SUSPENDS

GLOBE, Ariz., April 27.—Operations early Sunday morning were entirely suspended at the International Smelting company near Miami. About 300 men were thrown out of employment as the result of the shutdown. Approximately 65,000,000 pounds of copper are in storage at the company's plant.

The Miami Copper company, the only mine still producing ore in the district, will continue to operate, but will be forced to store its concentrates as a result of the closing down of the smelter.

PHOENIX MAN WINS HONORS AS TYPING CHAMPION OF STATE

PHOENIX, April 28.—Charles Walter, of Phoenix, veteran court reporter, is the amateur typewriting champion of Arizona. He won that title in open competition last night in the first annual state typing contest, held at the high school auditorium. Walters wrote 88 words, net, per minute.

BIG GOLD STRIKE NEAR WINKLEMAN

PHOENIX, April 28.—Word of a big gold strike in the mountains near Winkelman which is causing much excitement has been brought to Phoenix through a letter from J. W. McCann of Florence. That the strike looks like a big thing is the opinion of Mr. McCann.

PHOENIX TO CONDUCT CONCERTED DRIVE AGAINST FREIGHTS

PHOENIX, April 27.—With the prospect of lower rates on fruits and vegetables from California points to the east, Phoenix shippers acting thru the traffic bureau of the Phoenix chamber of commerce and the corporation commission are planning to take full advantage of certain hearings which have been ordered by the interstate commerce commission to secure suitable reductions for fruit and vegetable shippers of Arizona.

A wire was received by the commission yesterday from the secretary of the interstate commission to the effect that Henry J. Ford has been named as special assistant to conduct conference with the railroads and the shippers relative to the fruit and vegetable situation in California and Colorado at the request of the legislatures of these states.

The first of these conferences will be held at Los Angeles, May 3, the next at San Francisco, May 6, and the third at Denver, on May 10.

While the conferences will relate primarily to the rates to and from California and Colorado, carriers and shippers organizations from other fruit and vegetable districts will be granted opportunity of making statements.

Upon receipt of the wire its content was transmitted to A. A. Betts, member of the commission, now at Pueblo, requesting that R. J. Johnson of the rate department be allowed to attend the Los Angeles conference.

GREENLEE COUNTY TO BUILD CLIFTON-SILVER CITY ROAD

PHOENIX, April 27.—Despite the failure of Greenlee county to secure a legislative appropriation for a road from Clifton to the New Mexico state line to connect with a road to Silver City, N. M., the county has determined to put through the road at the earliest possible date.

The first step in this direction takes the form of a request to the state highway department for a survey up Mule Creek canyon. "Give us the survey and we will find plenty of money to do the work" is the proposition put up to the state highway engineer, and it is quite likely to receive favorable consideration.

Nothing further has been heard from the movement to bring proceedings against Governor Campbell to make null and void his disapproval of certain sections of the omnibus bill without vetoing the bill in its entirety. The bill will be attacked from another angle in proceedings which have been or are about to be instituted in Cochise county, seeking to kill the bill in its entirety, on account of alleged irregularities in connection with its passage.

OLD DOMINION CUTS PAY

GLOBE, April 27.—Notices were posted today at the Old Dominion company mine, announcing a reduction in wages of all employees, including those in receipt of monthly salaries. The notices, which bear the name of General Manager W. F. McBride, are substantially the same as those posted several days ago at the Miami Copper company. The reduction is effective May 1. Miners, who at present are receiving \$5.15 a shift, will be paid \$4.50 per shift; muckers, now getting \$4.65 per day will receive \$4. Surface employees, who have been receiving \$2.90 per day, will receive \$2.50. Monthly salaried employees will be reduced proportionately.

Your Shield Against Trouble

Funds thriftily banked will keep you in comfort when old age saps your earning power.

A Bank Account is a blessing if crops fail or business is bad, if you lose your job, if sickness or accident befalls you. And money banked with us is secured from loss through burglary, fire or other mishap.

PIEGE PURCHASES

JESS WIEN RANCH

W. A. Fiege has purchased what is known as the Jess Wien ranch west of his C ranch from H. W. Peacock and Herbert Lowdermilk, also their interests in all cattle owned jointly with Mr. Fiege. Mr. Fiege is now conducting the business as sole owner. Mr. Fiege has been in the cattle business in this section for about thirty-five years, and a drought and slump in cattle do not in the least deter him. He knows that in every line of endeavor the pendulum swings back and forth and when it has reached one extreme it gradually begins to swing back to normal.

WEIGHTS AND MEASURES

DEPT. ISSUES PAMPHLET

PHOENIX, April 28.—The state department of weights and measures has just issued two new pamphlets dealing with the weights and measures law and regulations of the department, one containing in brief form, the various provisions of the state weights and measures act, together with other information of value to the purchasing public, and the other setting forth instructions and tolerances to be followed by the various city sealers in their work of inspecting and testing weighing and measuring apparatus in the state.

Copies of the pamphlet on regulations are being sent to all city sealers.

of the state and to dealers in weighing and measuring apparatus for their guidance, while the pamphlet on the various provisions of the law may be obtained from the city sealers or from the state department upon request.

The latter bulletin, in addition to pointing out the requirements of the law, contains many helpful hints for the purchasing public as a guide to obtaining accurate weight and measurement, and tests for the purchaser's legal rights under the law.

"The purchasing public can be of material aid to the department," says Inspector Dyas, "by insisting that the sellers with whom they come in contact observe the various requirements of the weights and measures act. With a fore-knowledge of his rights under the law, there is no reason why every purchaser should not obtain full weight and measurement on every purchase."

ATTENTION LEASERS!

I have four claims, carrying good gold and silver values, which I would consider leasing to some responsible party with a little capital to erect a small concentrator. Concentrates should net at least \$100 per ton. Call on or write J. H. Tippet, Garces, Arizona, for further particulars.—Advt.

Prescott—Annex to Pioneers' home providing accommodations for 400 more guests to open July 1st.

Human Nature

An individual entrusted with the administration of an estate must necessarily—and very naturally consider his own affairs first, possibly to the neglect of the estate. Such a trusteeship is often of secondary importance.

It is the business of our trust department to handle estates and consequently the affairs of an estate are of primary importance with us. Our officers will gladly confer with you on this subject in strictest confidence.
